

Clark Howe (MD)

Welcome to the November newsletter! Can you believe how quickly this year has flown by? Christmas is already peeking around the corner, and the high streets will soon be decked out in full festive regalia (actually they already are). We know it's not everyone's cup of tea, but hey ho—or ho ho!

A quick heads-up: we will be closing for the Christmas and New Year period. To ensure you have what you need, we encourage you to order a little extra stock. Don't worry about over-ordering; we'll happily take back any excess (excluding special order items) in the New Year.

HOLIDAY CLOSING

Close: 4pm Monday 22nd December
Open: 8am Friday 2nd January

NEW PRODUCT - Leak Diverters. We've been committed to expanding our product range with exciting new additions all year, and this month is no exception. We're thrilled to introduce the new Leak Diverter range by Fentex!

Like virtually all Fentex products, these are manufactured in the UK, within 20 miles of Peterborough. By choosing them, you're not just getting a great product—you're supporting local independents and reinvesting in the regional economy.

So, what are they for? Leak Diverters are your go-to solution for those unexpected drips and leaks. Keep one on hand to protect expensive machinery and interior fittings from costly water damage. If you have a roof that's prone to leaking or manage a large site with multiple buildings, a Leak Diverter could be exactly what you need.

UPDATE: Chemical Safety Data Sheets. We've recently completed a significant review, and a good number of documents have been revised and are available for download on our website.

Now to start putting together the final newsletter of the year. As always, thank you for your support.

NOV 2025

Ledlenser: See Further

Ledlenser creates light. Even in the furthest, darkest corner of the world. Ledlenser are one of the world's market leaders in LED flashlights and headlamps, combining German engineering with the highest quality materials, technology, design & workmanship.

Rechargeable torches, flashlights, head torches, work lamps and mini torches from one of the world's best brands.

When you invest in Ledlenser you receive a light unit that will provide many years service.

Even better is that during the month of November we are able to offer a healthy discount across most of the range when ordered online.

Now is the time to get kitted out.

LEDLENSER

There are moments that ask you to simply pause, to let the world's quiet marvels stop you in your tracks. On my way to work, with the rhythmic swish of the wipers keeping time, I was gifted one of those

moments: a blazing sunrise to my right, and to my left, the gentle arc of a perfect rainbow. This was the first of October, around seven in the morning—a stunning, silent spectacle to begin the new month.

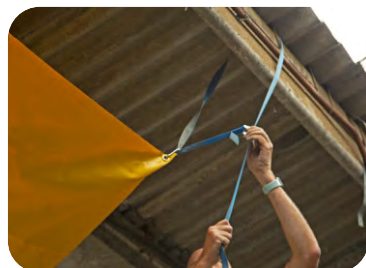

LEAK DIVERTER

- ✓ Safely diverts roof leaks away from goods & machinery and protects the workplace
- ✓ Prevents damage to valuable stock and machinery
- ✓ Reduces necessity to relocate goods and personnel
- ✓ Reduces accidental slips and falls
- ✓ Keeps water off the floor

Easy To Fit

Adjustable
Hanging Straps

Central
Drainage Point

Drains Into
Reservoir Drum

For Office
Or Industrial

The LEAK DIVERTER provides a temporary solution for roof and ceiling leaks, preventing workplace disruption. Adjustable straps allow easy positioning, and standard UK Hozelock fittings channel water safely into the included reservoir drum (also available separately). Available in four sizes and two colors, with optional accessories or as a complete kit.

Ready to use Virucidal Cleaner

An effective ready-to-use disinfectant, for use on most non-porous hard surfaces. Suitable for use in food preparation areas.

Kills 99.99% bacteria, enveloped viruses and yeasts in 60 seconds. Conforms to EN1276, EN13727, EN13624, EN1650 (yeast), EN16615, EN14476 (enveloped viruses) and EN16777 (enveloped viruses).

Ideal for use in hospitals, care homes where light levels of disinfection are required, as well as areas such as schools and leisure centres. It's fragrance-free formulation also makes it ideal for use in food prep areas.

Up-to-date?

Safety Data Sheets

We have recently performed a review of the safety data sheets for all chemicals detailed on our website as manufacturers do occasionally update the chemical composition of their products

Keeping your Safety Data Sheets (SDS) current is your key to workplace safety and compliance. An outdated SDS is dangerous, providing incorrect first aid, firefighting, or handling instructions if a product's formula changes. This can put employees at risk.

Regulations legally require employers to maintain up-to-date SDS for every hazardous chemical. Safety Data Sheets can be found against each chemical product on our website.

Going, Going, Nearly Gone

Say it isn't so! Due to circumstances beyond our control, ORN is retiring the incredibly popular Crane Faux Fur Lined Hoodie.

This isn't just gear; it's your go-to for winter comfort, whether you're on the job or enjoying a weekend adventure. To put it simply, this is your last call to get this beloved cosy clobber.

We're slashing prices in November to clear our remaining shelf stock, and we expect it to vanish in a heartbeat. A limited supply might be available from ORN for a short time—call us to check availability before it's gone for good!

P.S. While we say goodbye to this favourite, we're already on the hunt for amazing new options to keep you warm in the seasons to come. The search for the next winter champion is on!
